Summer 2020 Graduate Research Assistant Positions for MIIS students

Title: Graduate Research Assistant (GRA)
Hours: Up to 37.5 hours/week
To Apply: Please send your resume, short writing sample, and cover letter specifying language skills and topics/regions of interest to Eduardo Fujii at efujii@miis.edu

As a GRA, you will acquire on-the-job training with CNS experts and other leading scholars on nonproliferation issues by contributing to databases, website publications, fact sheets, and analytical issue briefs. GRAs will have opportunities to work on critical issues involving the proliferation of nuclear, chemical and biological weapons and ballistic missiles and strategies for their control. CNS's research interests also cover WMD terrorism and space security issues. GRAs are paid on an hourly basis and typically work 10-15 hours a week. Starting wage is negotiated based on the student's experience. The position is renewable contingent upon satisfactory academic progress and job performance.

Required Qualifications:

- Located in the United States;
- Excellent writing and analysis skills;
- General knowledge of WMD nonproliferation issues;
- Knowledge of and experience in conducting scholarly research;

While not required, the following qualifications are also desirable:

- MANPTS/Nonproliferation or Certificate student;
- Experience conducting research in the WMD nonproliferation field;
- Familiarity with Google Earth and major social media platforms (Twitter, Facebook, etc.)
- Familiarity with 3D modeling using SketchUp and/or Blender
- Familiarity with geospatial imagery analysis
- Familiarity with WordPress
- Science background
